Prepared By:

FAS Beijing Staff

Report Highlights:

In January 2019, China approved five new genetically engineered traits and renewed the bio-safety certificates for 26 traits previously approved. The table included with this report provides the updated list of Chinese GE trait approvals and supersedes the Appendix 2 published in the [2018 Agriculture Biotech Annual Report for China](#).

General Information:

The table provided below includes the updated list of GE trait approvals and renewals of previously approved GE traits and supersedes the Appendix 2 published in the [2018 Agriculture Biotech Annual Report for China](#). The biosafety certificates for those traits were valid starting from December 20, 2018 and are valid from a period of three to five years, depending on the crop.
