Food and Agricultural Import Regulations and Standards - Certification

FAIRS Export Certificate Report 2009

Approved By:

Grant Pettrie, Agricultural Counselor

Prepared By:

Lindy Crothers, Agricultural Marketing Specialist

Report Highlights:

This report provides **guidance** on export certificate requirements for a representative sample of products that have been identified as having excellent prospects in the Australian market. The information required to import into Australia is complex and changes frequently; therefore it is not possible to provide comprehensive information for every product in this report.

Sections Updated: All sections have been revised or updated.

DISCLAIMER: This report has been prepared by the USDA, Foreign Agricultural Service in Canberra, Australia for U.S. exporters of domestic food and agricultural products. Australia's quarantine regulations are constantly changing so it is impossible to provide complete detail in this report. *The information provided is for example only.* While every possible care was taken in the preparation of this report, information provided may not be completely accurate either because policies have changed since its preparation, or because clear and consistent information about these policies was not available. It is highly recommended that U.S. exporters verify the full set of import requirements with their Australian importer, who is normally best equipped to research such matters with local authorities, before any goods are shipped. FINAL IMPORT APPROVAL OF ANY PRODUCT IS SUBJECT TO AUSTRALIA'S RULES AND REGULATIONS AS INTERPRETED BY BORDER OFFICIALS AT THE TIME OF PRODUCT ENTRY.

Section I. List of All Export Certificates Required By Government:

Summary

Australia has very strict quarantine requirements for imported food and agricultural products. Import Permits and certifications are required for the majority of food and agricultural products entering the country. The information required to obtain an Import Permit is different for each product and can include such things as cooking/freezing times, 'area freedom from specific pest' declarations, certification for fumigation of containers, etc. Often there are very specific requirements for U.S. products that allow entry where the product, in general, is not allowed from other countries. The information required is updated frequently; therefore it is not possible to provide comprehensive information for every product in this report.

The Australian Quarantine & Inspection Service (AQIS) oversees the importation of all agricultural products entering Australia and maintains an on-line [Import Conditions \(ICON\) database](#) that is updated constantly. This database contains very detailed information on the quarantine requirements for products coming into this market. Before deciding to export any food or agricultural products to Australia, U.S. exporters should first check with this web site to ascertain whether they can meet Australia's requirements. If a product is not listed in the database, it is likely that it is not allowed entry to Australia. The full web site address is: http://www.aqis.gov.au/icon32/asp/ex_querycontent.asp

Import Permits

Import Permits are required by AQIS for a large number of fresh and semi-processed food products and some fully processed products entering Australia. Only an Australian-based individual or company can apply for an Import Permit. Import permits are generally valid for two years and can be used any number of times during that period. The Import Permit will dictate the complete conditions under which the product may enter Australia. The information required to apply for a permit differs greatly between products and can often differ for the same products from different regions.

U.S. exporters should work very closely with their Australian importers to make sure that

all conditions are met **before** shipping any product. Failure to do so will result in delays in product entering the country.

Examples of Australian Export Certification Requirements

The requirements listed in the table in the following section are provided as a **representative sample** of products that have been identified as having excellent prospects in the Australian market. Apart from these specific 'attestations' which refer only to export certification requirements, products must meet a range of other criteria specific to each commodity which may include, but is not limited to, packaging requirement, pre-clearance (if applicable), treatment options, and container conditions. A large amount of additional information may be required for each shipment. U.S. exporters are advised to consult the [ICON database](#) for complete import conditions for individual commodities. Example copies of certificates are not available as they differ for each product.

Examples of Export Certificate Attestations Required by Government of Australia

| Product | Title of Certificate | Attestation Required |
|-------------------------|------------------------------------|---|
| Cherries – fresh | APHIS Phytosanitary Certificate | <p>A single phytosanitary certificate (original) must accompany each cherry consignment, and must be endorsed by APHIS. It must include the following details:</p> <p>a) For California only: the packing house details and the orchard block/lot number contained in each consignment under the Distinguishing Marks section.</p> <p>b) For Pacific North West: the State or Federal/State lot numbers should be recorded under the Distinguishing Marks section. State or Federal/State lot numbers have three components (1) the authorizing agency listed first; (2) a unique facility identification number is next; (3) followed by the date or serial number which indicates the day of packing.</p> <p>c) The shipping container number/s and container seal number/s are preferred (but not mandatory and can be shown on the Bill of lading), and should be included on the Phytosanitary certificate under "Distinguishing marks" where these details are known at the time the Phytosanitary certificate is being prepared.</p> <p>d) The Phytosanitary certificate must also have the additional declarations, incorporating the mandatory preclearance declaration and fruit fly declaration, as below.</p> <p>"The cherries in this consignment were grown in [name(s) of County/Counties and State], and were</p> |

| | | |
|---|--|---|
| | | <p>fumigated and packed in [name(s) of County/Countries and State]. All growing, fumigating and packing of these cherries occurred either in Counties that are free of fruit flies except <i>Rhagoletis</i> spp. or in areas that are located in excess of 15 km from any fruit fly declared areas." and</p> <p>"AQIS pre-clearance inspection was undertaken on cherries produced in Washington (or Idaho or Oregon) in accordance with the Work Plan for the pre-clearance of cherries to Australia."</p> <p>e) A single photocopy of the relevant Notice of Intention to export (NOI) must be attached or forwarded with the Phytosanitary certificate. Pre-cleared pallet card numbers included in the consignment marked i.e. ticked, asterisk, or underlined. Use of a text highlighter is not recommended, as it is difficult to photocopy or fax.</p> <p>f) The relevant NOI number/s must be noted on the Phytosanitary certificate.</p> <p>g) The following fumigation details:</p> <ul style="list-style-type: none"> - The name of the fumigation facility. - The date of fumigation. - The concentration of methyl bromide [CH₃Br] (g/m³). - The fumigation duration. - The ambient air temperature during fumigation (°C). - The cherry pulp temperature during fumigation (°C). |
| <p>Table Grapes - fresh (from California only)</p> | <p>APHIS Phytosanitary Certificate</p> | <p>A single phytosanitary certificate (original) must accompany each table grape consignment, and must be endorsed by APHIS. It must include the following details:</p> <p>a) A photocopy of the relevant Notice of Intention to export (NOI) must be attached or forwarded with the Phytosanitary certificate. Pre-cleared pallet card numbers included in the consignment clearly marked i.e. ticked, asterisk, or underlined. Use of a text highlighter is not recommended, as it is difficult to photocopy or fax.</p> <p>b) The relevant NOI number/s must be noted on the Phytosanitary certificate.</p> <p>c) The shipping container number/s and container seal number/s are preferred (but not mandatory and can be shown on the Bill of lading), and should be included on the Phytosanitary certificate under "Distinguishing marks" where these details are known at the time the</p> |

| | | |
|---|----------------------------------|--|
| | | <p>Phytosanitary certificate is being prepared.</p> <p>d) The following additional declarations stating:</p> <p>"The grapes in this consignment have been produced in California in accordance with the conditions governing the entry of fresh table grapes from California to Australia.", and</p> <p>"AQIS Pre-clearance inspection undertaken in California in accordance with the Work Plan for the pre-clearance of table grapes to Australia."</p> <p>e) Table grapes that have undergone SO₂/ CO₂ fumigation /and inspection must be held, and transported, under secure conditions after fumigation – and in a manner that precludes re-infestation or contamination from soil or other debris.</p> |
| <p>Prunus Spp (Apricots, Cherries, Plums, Peaches) with seeds – sun-dried, unprocessed, tenderized, rehydrated, dehydrated</p> | <p>Phytosanitary Certificate</p> | <p>Each consignment must be accompanied by a phytosanitary certificate with the following endorsements:</p> <p>"The product was grown in (the country of origin of the consignment)", and</p> <p>"(Country of origin) is free from Plum Pox Virus Disease."</p> |
| <p>Citrus (precleared from California or Arizona)</p> | <p>Phytosanitary Certificate</p> | <p>All fresh citrus that has been inspected offshore must be clearly labeled and legibly identified by pallet numbers or grower lot numbers on a "Notice of Intention to Export" (NOI). A copy of the relevant NOI/s must be forwarded to Australia with the original Phytosanitary certificate accompanying the consignment.</p> <p>All consignments must also be accompanied by a Phytosanitary certificate with the additional declarations, incorporating two mandatory preclearance declarations and one fruit fly declaration, as described below.:</p> <p>a) "The citrus fruits in this consignment have been produced in California or Arizona in accordance with the conditions governing the entry of fresh citrus fruits from California or Arizona to Australia." AND</p> <p>b) "AQIS pre-clearance inspection undertaken in California or Arizona in accordance with the Work Plan for the pre-clearance of citrus fruits to Australia."</p> |

| | | |
|---|----------------------------------|---|
| | | <p>Fruit fly additional declarations - The Phytosanitary certificate must also have one of the following fruit fly additional declarations in addition to both of the additional declarations listed above.</p> <p>a) "The fruit in this consignment was sourced and packed in California or Arizona which is free of all exotic fruit flies." or</p> <p>b) "The fruit in this consignment was sourced and packed in [name of Californian or Arizona County] which is an area free of all exotic fruit flies." or</p> <p>c) "The fruit in this consignment was sourced and packed in [name of Californian or Arizona County] which is an area located in excess of 15 kilometers from the epicenter of any exotic fruit fly declared areas, including Mediterranean fruit fly (<i>Ceratitis capitata</i>)." or</p> <p>d) "The fruit has been stored for 14 days at 0°C ± 0.5°C".</p> |
| <p>Citrus (not precleared) from California, Arizona & Texas only</p> | <p>Phytosanitary Certificate</p> | <p>Each consignment must be accompanied by an original Phytosanitary certificate endorsed with one of the following fruit fly additional declarations:</p> <p>a) "The fruit in this consignment was sourced and packed in [name of State] which is free of all exotic fruit flies." or</p> <p>b) "The fruit in this consignment was sourced and packed in [name of County] which is an area free of all exotic fruit flies." or</p> <p>c) "The fruit in this consignment was sourced and packed in [name of County] which is an area located in excess of 15 kilometers from the epicenter of any exotic fruit fly declared areas, including Mediterranean fruit fly (<i>Ceratitis capitata</i>)." or</p> <p>d) "The fruit has been stored for 14 days at 0°C ± 0.5°C".</p> |
| <p>Strawberries (fresh)</p> | <p>Phytosanitary Certificate</p> | <p>Each consignment must be accompanied by a Phytosanitary certificate endorsed with the following additional declaration:</p> <p>a) "Fruit fumigated with methyl bromide at the rate of 48g/m³ for 3 hours at a flesh temperature of not less than 18°C", or</p> <p>An original commercial fumigation certificate endorsed</p> |

| | | |
|--|---------------------------|--|
| | | to show that fruit has been fumigated with methyl bromide at the rate of 48g/m ³ for 3 hours at a flesh temperature of not less than 18°C. |
| Dates – Fresh from CA only (no stems allowed) | Phytosanitary Certificate | <p>Each consignment must be accompanied by a Phytosanitary certificate endorsed with one of the following additional declarations:</p> <p>a) “The fruit in this consignment was sourced and packed in [insert name of State] which is free of all economically significant fruit flies”, or</p> <p>b) “The fruit in this consignment was sourced and packed in [insert name of County] which is an area free of all economically significant fruit flies”, or</p> <p>c) “The fruit in this consignment was sourced and packed in [insert name of County] which is an area located in excess of 15 kilometers from any fruit fly declared areas”.</p> <p>This area freedom certification must include the nominated County or State name.</p> |
| Onions (fresh) – from specified counties of California, Idaho & Oregon only | Phytosanitary Certificate | <p>Each consignment must be accompanied by a Phytosanitary certificate endorsed:</p> <p>“The [insert name of produce, e.g. onions, shallots, leeks, chives] were grown in [insert name of district or county] where onion smut (<i>Urocystis cepulae</i>) is not known to occur”.</p> <p>If live quarantinable insects other than stored product pests are found (this includes insects that have not previously been categorized by AQIS, and insects which are unable to be identified to species level), the shipment must be fumigated with methyl bromide at 40g/m³ for 3 hours at 21°C (see treatment options in ICON database).</p> |
| Figs (fresh) – from mainland USA only | Phytosanitary Certificate | <p>Each consignment must be accompanied by a Phytosanitary certificate endorsed with one of the following additional declarations:</p> <p>a) “The fruit in this consignment was sourced and packed in [insert name of State] which is free of all economically significant fruit flies”, or</p> <p>b) “The fruit in this consignment was sourced and packed in [insert name of County] which is an area free of all economically significant fruit flies”, or</p> <p>c) “The fruit in this consignment was sourced and</p> |

| | | |
|---|--|---|
| | | <p>packed in [insert name of County] which is an area located in excess of 15 kilometers from any fruit fly declared areas".</p> <p>This area freedom certification must include the nominated County or State name.</p> |
| <p>Almonds (shelled) – raw or unprocessed</p> | <p>Phytosanitary Certificate & Treatment Certificate</p> | <p><u>Pre-shipment treatment</u></p> <p>Consignments that have been treated pre-shipment (see ICON database for treatment options) must be accompanied by a treatment certificate and Phytosanitary certificate. The Phytosanitary certificate must indicate the name of the treatment provider and that the almond nuts were treated within 21 days of containerization or export. The treatment certificate must specify the temperature, rate and number of days that the consignment was treated for.</p> <p>If the nuts have been fumigated with phosphine prior to shipment, the Phytosanitary certificate must state that: "The phosphine concentration did not fall below 0.15g/m³ at any point during the fumigation period".</p> <p>Nuts packed in gas-proof packaging (e.g.: tins, plastic lined cartons, multi-walled paper sacks with plastic coatings) must be accompanied by a Phytosanitary certificate or commercial fumigation certificate that states that: "The almond nuts in this consignment were treated immediately prior to sealing or packaging".</p> |
| <p>Pet Food for dogs and cats (dry or semi- moist)</p> | | <p>a) For pet food from manufacturing facilities with Good Manufacturing Practices (GMP), International Organization for Standardization (ISO) or similar certification, Import Permit applications should be accompanied by government certification (from the exporting country) relating to each final product, and confirming ingredient sourcing and processing. The Import Permit conditions in this case will generally state that consignments are to be accompanied by a manufacturer's declaration only (and will not require additional government certification).</p> <p>b) For pet food from facilities without GMP or ISO certification, or in cases where an official government certificate as detailed in a) above has not been provided at the time of application, Import Permit conditions will state that consignments are to be accompanied by both a manufacturer's declaration and government certification. Specific statements required of this documentation will be outlined in the Import Permit conditions.</p> |

| | | |
|---|--|---|
| | | c) Documentation must comply with format requirements or as detailed in the Import Permit conditions. |
| Pork – uncooked, destined for processing | | Import Permit conditions will specify the requirement for consignments to be accompanied by government certification relating to the product, the animals from which it was derived and relevant processing and packaging details. Certification must comply with format requirements as detailed in PQA0194: Government certification - format requirements, or as specified by the Import Permit. |

Section II. Purpose of Specific Export Certificate(s)

See table in Section I.

Section III. Specific Attestations Required on Export Certificate(s)

See table in Section I for examples of specific attestations. Complete details of all attestations required are provided by the Australian authorities when an application for an Import Permit is made by the importer.

Section IV. Government Certificate’s Legal Entry Requirements

Entry requirements are set out on the import permit. A copy of the import permit plus the originals of any other documentation - airway bill or bill of lading, invoices, and any other papers (including packing lists, insurance documents), etc. relating to the shipment must accompany each shipment. The Minimum Documentary Requirements for all imported products are available at: <http://www.daff.gov.au/aqis/import/general-info/documentary-requirements>.

Depending on the product covered, Import Permits can be valid for up to two years (i.e. covering all shipments during that period).

Section V. Other Certification/Accreditation Requirements

Apart from Quarantine regulations, products being imported into Australia must also meet a number of other requirements. Details of these requirements are contained in the Food and Agriculture Import Regulations and Standards (FAIRS) report updated each year by this office. The most recent update was July 2009. The report can be downloaded on the FAS website

at: <http://gain.fas.usda.gov/Recent%20GAIN%20Publications/Forms/AllItems.aspx>.

Recent Marketing Reports from FAS/Canberra:
