Food and Agricultural Import Regulations and Standards - Certification

2015 FAIRS Export Certificate Report

Approved By:

Jude Akhidenor, Regional Agricultural Attaché

Prepared By:

Fana Sylla, Agricultural Specialist

Report Highlights:

This report is a reissuance of the 2014 FAIRS export certificate report with no additional information. Senegal is a member of the *International Plant Protection Convention* (IPPC). Since 2014 it has continued to authorize optional use of ePhyto, international standard for electronic transmission protocols and procedures for plant health certification, although it has been not fully implemented in most countries. This report provides information on export certificates required by the *Government of Senegal* (GOS) for processed food, animal products, live animals (cattle, pets, etc), plants, and products for animal consumption.

- Phytosanitary Certificate.....	11

Disclaimer: This report was prepared by the Office of Agricultural Affairs of the USDA/FAS in Dakar for U.S. exporters of domestic food and agricultural products. While every possible care has been taken in the preparation of this report, information provided may not be completely accurate either because policies have changed since its preparation, or because clear and consistent information about these policies was not available. It is highly recommended that U.S. exporters verify the full set of import requirements with their foreign customers who are normally best equipped to research such matters with local authorities, before any goods are shipped. FINAL IMPORT APPROVAL OF ANY PRODUCT IS SUBJECT TO THE IMPORTING COUNTRY'S RULES AND REGULATIONS AS INTERPRETED BY BORDER OFFICIALS AT THE TIME OF PRODUCT ENTRY.

Section I. List of All Export Certificates Required By Government (Matrix):

Product(s)	Title of certificate	Attestation Required on Certificate	Purpose	Requesting Ministry
Plants, plant parts, seeds, soil, manure, compost and all packaging used for transportation	Phytosanitary certificate	Plants or plant products have been: -Inspected according to appropriate procedures -Considered to be free from quarantine pests and practically free from other harmful organisms -Complied with the current Senegalese phytosanitary regulation	Phytosanitary	Ministry of Agriculture and Rural Equipment
Live animals (horses, mules and their crosses, bovine, ovine, caprine, porcine, canine, feline, animals of avian species, leparopidae, camels, wildlife animals and hatching eggs, semen, ova, and embryos animal.	Zoo-sanitary certificate	Live animals and products do not present any sign of clinical disease. It is established according to international standards of the <i>International Office of Epizootics</i> (OIE) by official veterinarian of the exporting country.	Animal health and veterinary	Ministry of Livestock and Animal Production
Day old chicks for breeding	Health certificate	Chicks are free from avian influenza.	Animal health and veterinary	Ministry of Livestock and Animal Production
Hatching Eggs	-Certificate of origin -Health certificate	Eggs are disinfected before boarding.	Animal health and veterinary	Ministry of Livestock and Animal Production
Animal products (meat, consumed eggs, prepared foods with animal products)	Health certificate	-Meat and packages of meat are stamped certifying that they come from animals slaughtered in approved slaughterhouses -Meat is declared fit for human consumption -Meat was cut in an approved cutting plant -Meat satisfies the requirements established by regulations put in force in Senegal related to	Food safety	Ministry of Livestock and Animal Production

		safety of meat products.

Section II. Purpose of Specific Export Certificate(s)

- 1- **Certificate name:** Phytosanitary certificate for plants, plant parts, seeds, soil, manure, compost and all packaging used for transporting products from the United States for export to Senegal.

Certificate purpose: This certificate is for phytosanitary purposes. It certifies that goods are free from parasites. The original must accompany the consignment. It is for product origin identification and health attestation. This certificate is not required for fruits and vegetables intended for consumption except for those listed in Annex I of the Decree 60-121 SG.

In 2014, Senegal had eleven control post at its borders to improve monitoring of plant products that enter the country.

Certificate required by: Ministry of Agriculture and Rural Equipment

In 2014, Senegal adopted the international standard for electronic transmission protocols and procedures for plant health certification (ePhyto). Its use remains optional as it is not fully implemented in most countries. It was developed by the *Commission on Phytosanitary Measures* (CPM), which is the governing body of the *International Plant Protection Convention* (IPPC). ePhyto is intended to improve the safety transmission of certificates (electronic versus paper), and preparation of arrival and clearance documents for plants and plant products at custom borders.

Further information on ePhyto can be obtained from the IPPC Secretariat (ippc@fao.org) or from the ePhyto page, www.ippc.int/index.php?id=1111140.

- 2- **Certificate name:** Zoo-sanitary certificate for live animals (horses, mules and their crosses, bovine, ovine, caprine, porcine, canine, feline, animals of avian species, leparopidae, camels as well as wildlife animals and hatching eggs, semen, ova and embryos animal intended for export to Senegal.

Certificate purpose: This certificate is for zoo-sanitary purposes to prove that:

- Animals are healthy and come from a farm free from any recognized contagious disease as per established standards by the international *Animal Health Code (code zoo-sanitaire)* of the *Office International des Epizooties* (OIE)
- Hatching eggs were disinfected under official veterinary supervision, and they come from farms where vaccination against *legally contagious diseases* (MLC) has been provided
- Animals come from a region not officially declared infected with contagious disease for more

than six weeks

- Animals come from farms regularly inspected by an authorized veterinary officer
- Animals are immunized against *Rinderpest* and *Contagious Bovine Peripneumonia* (CBPP) for more than 10 days or come from free areas for six months
- Animals of bovine species, their ova and embryos, fresh meat (bone or deboned) and cattle meat derived products, meal meat and bone meal and any derived animal feed does not come from a country where *Bovine Spongiform Encephalopathy* (BSE) has been reported
- Sheeps and goats are immunized with a killed vaccine against *Rift Valley Fever*, *Peste des Petits Ruminants* (PPR) or come from free zones
- Canine and feline animals should be accompanied by an *International Rabies Vaccination Certificate* dated more than fifteen days and less than one year
- A statement noting the animals of avian species have or have not been vaccinated against the MLC. For vaccinated animals, the date of vaccination and the nature of the vaccine used should be specified
- Semen, ova or embryos of bovine, sheep, swine, and horses come from healthy donors according to standards set by the *International Animal Health Code* for each disease

The expected date of entry of exported live animals including hatching eggs, semen, ova and embryos animal should be communicated to the veterinary service at least 15 days prior to shipment.

Certificate is required by: Ministry of Livestock and Animal Production

3- Certificate name: Health certificate for animal products (meat, consumable eggs, prepared foods with animal products) intended for export to Senegal.

Certificate purpose: This certificate is for food safety. It proves that products come from healthy animals and have been prepared, handled and stored according to food safety regulations for animal products.

In addition:

- Meat presented in whole carcass must be marked with the stamp of an approved slaughter house
- Meat and poultry cuts and organ meats must present on packaging all the indications regarding the date of animals slaughter, approved cutting plant, packaging and date of expiration
- Products prepared or preserved intended for human consumption should mention on the packaging the dates of preparation and expiration

Note: animals not accompanied by health certificate will be quarantined and checked for 15 days at the expense of their owners.

Certificate is required by: Ministry of Livestock and Animal Production.

Section III. Specific Attestations Required on Export Certificate(s)

For phytosanitary purpose, exporters of products listed in Table I - class “C” and table II (in Annex I of the Decree 60-121 SG) must submit prior to shipment a request of exportation of plants delivered to the *Directorate of Plant Protection (DPV)*. This request should mention the origin and quantity of the product and the address of the supplier. The exporter should also indicate:

- If they are seeds, bulbs, tubers, soils, etc. and the name of the varieties
- If they are intended for sale, personal use, culture, manufacturing, consumption or culture for sale
- The exact location where the goods will be sold or grown

Samples of food products that enter Senegal’s market are submitted to sanitary inspections by the *Laboratory of the Directorate of Domestic Trade* under the Ministry of Trade for testing. These tests are conducted on four samples selected randomly from the shipment, but they do not preclude the importer from pursuing the registration approval process. Importers must also complete and request a *Declaration of Imported Food (DIPA)* from the *Division of Consumer and Consumer Safety (DCCS)* at the Senegalese Ministry of Trade.

Section IV. Government Certificate’s Legal Entry Requirements

All certificates listed in this report must accompany the product at the time of entry, and must be originals.

Section V. Other Certification/Accreditation Requirements

The following products – regardless of the type of preservation (chilling, freezing, cooking, salting.) used -will be checked for safety (organoleptic, microbiological ...) before allowed entering into Senegalese territory:

- Butcher’s meat (pork, sheep, beef, horse)
- Ground meat in advance
- Cooked meat
- Meat products (sausages, ham...)
- Prepared meals in advance
- Dehydrated soups
- Poultry meat
- Organ meats (liver, heart, leg, head of pork, sheep, beef and horse, liver, heart, gizzard rump of poultry)
- Eggs and egg products, pastries, custards
- Fermented or acidified milk, fermented milk curds (yogurt, kefir), milk jelly, milk powder, cheese, fresh pasteurized cream, ice creams and icy, casein, butter and margarine

- Canned food made from animal products or originated from animal
- Semi-preserved foods made from animal products or originated from animal
- Milk intended for heat treatment or processing
- Honey and wax
- Canned vegetables
- Hides and skins
- Meat meal and poultry meal, feather
- Animal fat

Products listed on Table I Class “B” of Annex 1 of Decree 60-121 SG can only be introduced in Senegal by the *Directorate of Plant Protection Service (DPV)*.

For fresh meat, chilled or frozen milk and its derivatives, analysis showing the presence or absence of residues of antibiotics, artificial radionuclide, anabolic hormone or any other contaminant that may constitute a threat to public health will be required.

For day old chicks for breeding, an animal health certificate is required and should be established by official veterinary services of the exporting country certifying that the chicks are free from avian influenza.

For hatching eggs, a certificate of origin and health prepared by the staff veterinary official of the exporting country attesting to the disinfection of eggs before boarding will be required. Authorized eggs will be disinfected by the veterinary services in Senegal before their removal.

- **Zoo-Sanitary Certificate for Export of Domestic or Wild Animals of Bovine Bubaline**
- **Phytosanitary Certificate**

HEALTH CERTIFICATE FOR MEAT IMPORT OF DOMESTIC ANIMALS
(Bovine bubaline, equine, sheep, goats, swine, or poultry)

I. Identification of meat

Nature of cuts:

Nature of packaging:

Quantity of cuts or packages:

Net weight:

Date of production

Expiration date

I. Origin of meat

Address (es) and veterinary agreement number (s) of the slaughterhouses:

Address (es) and veterinary agreement number of the cutting plant

I. Destination of meat

The meat will be sent from: (place of dispatch) to : (country and place of destination)

a. Nature and identification of type of transportation:

Name and address of exporter:

Name and address of recipient:

I. Health attestation

The undersigned veterinarian official certifies that:

- a. Meat and packages of meat described above are stamped certifying that they come from animals slaughtered in approved slaughterhouses;
- b. Meat is declared fit for human consumption;
- c. Meat was cut in an approved cutting plant;
- d. Meat satisfies the requirements established by the regulations put in force in Senegal relating to the safety of meat products.
