Morocco

Food and Agricultural Import Regulations and Standards - Certification

2009

Approved By:
Hassan F. Ahmed, U.S Embassy, Rabat

Prepared By:
Abdessalam Cherkaoui, U.S Embassy, Rabat

Report Highlights:
This report provides an update on the list of certificates required to export food and agricultural products to Morocco. A new model certificate for U.S. equine is being finalized by USDA/APHIS and the Moroccan Ministry of Agriculture. In 2009, the National Office of Food Safety (ONSSA) was established to deal with safety and inspection of imported and exported food products. Starting January 2010, ONSSA will be the main Moroccan agency to handle import certificates for agricultural and food products.
Section I. List of All Export Certificates Required By Government (Matrix):

At the points of entry, the sanitary control and the conformity with the local regulation for food and agricultural products is carried out primarily by Ministry of Agriculture inspectors. In major ports (Casablanca, Agadir, and Tangier), the importer deals with one Ministry of Agriculture office, the DCQ (Direction de Contrôle de la Qualité) and the dispatch of

the importation documents is done internally depending of the type of product (animal, plant, raw, or processed).

Typically, the clearing process by DCQ inspectors consists of up to three major steps based on the familiarity with commodity, importer’s experience, and origin:

a. The inspector clears the commodity by merely checking the documents provided.
b. The inspector might require physical inspection of the imported commodity before clearance.
c. The inspector might require that samples of the imported goods be drawn and sent to local GOM approved laboratory for analysis.

DCQ inspectors issue a certificate that authorizes the importer to clear customs. Customs officers will not authorize the goods into the country without a certificate issued at the point of entry by the DCQ inspectors.

For newly imported products, the exporter should provide extensive documentation (description of the products, lab analysis result, certification of approval by the government of the exporting country, etc.) to help DCQ inspector make a quick decision and not request laboratory analysis. Some importers send samples of newly imported products to the DCQ office before they ship the products to get a feel of what would be required to swiftly clear customs.

Normally, it takes less than a week to clear products through customs. If a sample of food is taken for laboratory analysis, the customs clearance may be delayed several days.

In addition, the certificates that are typically required by customs office are:

- Bill of lading:

To ensure that imported commodities benefit from the preferential treatment under the Morocco-US FTA, the Moroccan customs require that the bill of lading explicitly indicate the U.S. as origin and Morocco as destination. For trans-shipments, U.S. exporters will likely be requested to provide evidence that the commodity was meant to be shipped to Morocco when it left the United States.

- Original invoice
- Packing List
- Certificate issued by the Ministry of Agriculture DCQ that the commodity has been inspected and passed the sanitary control.
- Certificate of Origin. Although under the FTA with the U.S. the certificate of origin will not be requested and the origin will be determined by the importer’s declaration and accompanying documents (invoice, bill of lading, etc.)

### Section II. Purpose of Specific Export Certificate(s)

1. **Non Animal Origin Processed Food Products**

   **Name of the Certificate:** “Certificate of Conformity” or “Certificate of Lab Analysis”
   **Purpose of the Certificate:** Products content conforms to what is on the label. Especially useful for the first time shipments. Detailed analysis is likely to prevent requirement by inspectors of local laboratory testing.
   **Requiring Ministry:** Ministry of Agriculture, National Office for Food Safety (ONSSA)

2. **Processed Food Products containing some Animal Origin Products (except beef).**

   **Name of the Certificate:** Certificate of free sale (Wholesomeness) issued at State level where the product was manufactured
   **Purpose of the Certificate:** Product is freely sold in the U.S. and the manufacturer complies with U.S. sanitary regulations and requirements.
   **Requiring Ministry:** Ministry of Agriculture, National Office for Food Safety (ONSSA)

3. **Food for Special Use (Health Food, Diet Food, Food Supplements, etc.)**

   **Name of the Certificate:** Two certificates are required
   - “Certificate of Conformity” or “Certificate of Lab Analysis”
   - Registration Certificate delivered by the Moroccan Ministry of Health
**Purpose of the Certificate**: Products content conforms to what is on the label. Especially useful for the first few shipments. Detailed analysis is likely to prevent requirement by inspectors of local laboratory testing.

**Requiring Ministry**: Ministry of Agriculture, National Office for Food Safety (ONSSA)

### 4. Plants and Parts of Plants

**Name of the Certificate**: Phytosanitary Certificate according to the IPPC model.

**Purpose of the Certificate**: Certify that the plants or parts of plants are free of quarantine pests.

**Requiring Ministry**: Ministry of Agriculture, National Office for Food Safety (ONSSA)

The phytosanitary certificates must be issued no more than 14 days before the actual shipping.

### 5. Apples

**Name of the Certificate**: Phytosanitary Certificate with additional declaration

**Purpose of the Certificate**: Certify that the plants or parts of plants are free of quarantine pests.

**Requiring Ministry**: Ministry of Agriculture, National Office for Food Safety (ONSSA)

The phytosanitary certificates must be issued no more than 14 days before the actual shipping.

### 6. Tomatoes and Eggplants Seeds

**Name of the Certificate**: Phytosanitary Certificate with additional declaration

**Purpose of the Certificate**: Certify that the plants or parts of plants are free of quarantine pests.

**Requiring Ministry**: Ministry of Agriculture, National Office for Food Safety (ONSSA)

The phytosanitary certificates must be issued no more than 14 days before the actual shipping.

### 7. Dairy Products

**Name of the Certificate**: Two Certificates are required:
- Sanitary Certificate issued by AMS/USDA See model #3 in Appendix
- APHIS/USDA Certificate: Standard VS Form 15-4 with no additional declarations.

To avoid any complications at the Moroccan ports, please ensure that the date of the certificate issued by AMS is prior to the date of shipment. The date on APHIS certificate can be subsequent to the date of shipment.

**Purpose of the Certificate**: Ensure wholesomeness of the products and that the product complies with the existing U.S. food safety requirements and regulations

**Requiring Ministry**: Ministry of Agriculture, National Office for Food Safety (ONSSA)

### 8. Beef

**Name of the Certificates**: Several Certificates are required:
- Sanitary Certificate (Still being negotiated)
- Certificate of Physical, chemical, and microbiological analysis
- Halal Certificate
- AMS/USDA Grade Certificate (if to be imported as Hilton Meat)
**Purpose of the Certificates:**
- Sanitary Certificate and Certificate of Physical, Chemical, and Microbiological Analysis: Ensure wholesomeness of the products and that the product complies with the existing U.S. food safety requirements and regulations
- Halal Certificate: Meat slaughtered according to the Islam ritual
- AMS/USDA Certificate: must be graded Choice To qualify for the “Hilton Meat” Tariff rate quota.

**Requiring Ministry:**
- Ministry of Agriculture, National Office for Food Safety (ONSSA)
- AMS/USDA Certificate is required by Customs to grant the preferential access under the US-Morocco Free Trade Agreement.

9. Poultry Meat

**Name of the Certificates:** Several Certificates are required:
- FSIS Meat and Poultry Export Certificate of Wholesomeness as agreed upon with Moroccan Authorities (still being negotiated)
- Certificate of Physical, chemical, and microbiological analysis
- Halal Certificate

**Purpose of the Certificates:**
- Sanitary Certificate and Certificate of Physical, Chemical, and Microbiological Analysis: Ensure wholesomeness of the products and that the product complies with the existing U.S. food safety requirements and regulations
- Halal Certificate: Meat slaughtered according to the Islam ritual

**Requiring Ministry:** Ministry of Agriculture, National Office for Food Safety (ONSSA)

10. Equine

**Name of the Certificates:**
- Veterinary Sanitary Certificate for Equine Export from the United State to the Kingdom of Morocco

**Purpose of the Certificates**
Sanitary Certificate and Laboratory Test Results: Prevent import of animals with diseases of concern. The proposed certificate by APHIS was sent to Moroccan MinAg which made some remarks and sent them back to APHIS. This certificate is almost finished.

**Requiring Ministry:** Ministry of Agriculture, National Office for Food Safety (ONSSA)

11. Live Cattle - Purebred

**Name of the Certificates:**
- Results of Laboratory Analysis
- Performance Records
Purpose of the Certificates:
- Sanitary Certificate and Laboratory Test Results: Prevent import of animals with diseases of concern.
- Performance Records: The Ministry of Agriculture has a minimum requirement of performance of the imported animals and their parents. Only some breeds can be imported into Morocco.

Requiring Ministry: Ministry of Agriculture, National Office for Food Safety (ONSSA)

12. Semen - Cattle

Name of the Certificates:
- Sanitary Certificate
- Results of Laboratory Analysis
- Performance Records

Purpose of the Certificates:
- Sanitary Certificate and Laboratory Test Results: Prevent import of semen with diseases of concern.
- Performance Records: The Ministry of Agriculture has a minimum requirement of performance of the imported animals and their parents. Only semen of some breeds can be imported into Morocco.

Requiring Ministry: Ministry of Agriculture, National Office for Food Safety (ONSSA)

13. Milk Replacers / Calf Milk

Name of the Certificates: Sanitary Certificate for Import of Calf Milk and Milk Replacers into the Kingdom Of Morocco

Purpose of the Certificates: ensure wholesomeness of the imported milk replacers

Requiring Ministry: Ministry of Agriculture, National Office for Food Safety (ONSSA)

14. Honey and Bee Products

Name of the Certificates: Sanitary Veterinary Certificate For Import Of Bee Products into the Kingdom of Morocco

Purpose of the Certificates: ensure wholesomeness of the imported bee products

Requiring Ministry: Ministry of Agriculture, National Office for Food Safety (ONSSA)

15. Hides and Skins

Name of the Certificates: Sanitary Veterinary Certificate For Import Of Hides and Skins into the Kingdom of Morocco

Purpose of the Certificates: ensure wholesomeness of the imported milk replacers

Requiring Ministry: Ministry of Agriculture, National Office for Food Safety (ONSSA)

16. Hatching Eggs

Name of the Certificates: Sanitary Veterinary Certificate For Import Of Hatching Eggs into the Kingdom of Morocco

Purpose of the Certificates: Ensure that the imported product is healthy and free of diseases of concern.

Requiring Ministry: Ministry of Agriculture, National Office for Food Safety (ONSSA)

17. Day Old Turkey
Name of the Certificates: Sanitary Certificate for Export of Day Old Turkey to the Kingdom of Morocco

Purpose of the Certificates: Prevent imports of that are unhealthy or have diseases of concern

Requiring Ministry: Ministry of Agriculture, National Office for Food Safety (ONSSA)

Section III. Specific Attestations Required on Export Certificate(s)

1. Animal Origin Processed Food Products

Chemical and Physical Laboratory Analysis Results of the Product. Product is suitable for food use.

2. Processed Food Products containing some Animal Origin Products (except beef)

See model certificate # 1 in Appendix developed by USDA and Ministry of Agriculture

Manufacturer is inspected periodically and is in substantial compliance with current good manufacturing practices and relevant FDA requirements

3. Food for Special Use (Health Food, Diet Food, Food Supplements, etc.)

See model certificate # 1 in Appendix developed by USDA and Ministry of Agriculture for products that are registered before the Moroccan Ministry of Health.

Manufacturer is inspected periodically and is in substantial compliance with current good manufacturing practices and relevant FDA requirements.

4. Plants and Parts of Plants

See Standardized IPPC Phytosanitary model.

5. Apples

Standard APHIS Certification: “This is to certify that the plants, plant product or other regulated articles described herein have been inspected and/or tested according to appropriate official procedures and are considered to be free from the quarantine pests, specified by the importing contracting party and to conform with the current phytosanitary requirements of the importing contracting party including those for regulated-non quarantine pests.”

Mandatory Additional Declaration: Either Option 1 or Option 2

- **Option 1:** “The fruit was grown in a production area of the USA in which, on the basis of the official annual surveys, the Apple Maggot does not occur”

- **Option 2:** “The Fruit was inspected at the time of shipment and is apparently free of Apple Maggot”

AND

Documentation of a cold treatment that would meet one of the two treatment options:
- The fruit has continually been maintained at a maximum temperature of 0.0 degrees Celsius (32 degrees Fahrenheit) for a minimum of 40 days,
- The fruit has been maintained at a maximum of 3.3 degrees Celcius (37.9 degrees Fahrenheit) for a minimum of 90 days.
6. Tomatoes and Eggplant Seeds

Certify that the plants or parts of plants are free of quarantine pests.

APHIS Phytosanitary Certificate must include the following Additional Declaration: “The seeds are free from….. clavibacter michiganense pv. Michiganense and Ralstonia solanacearum.”

7. Dairy Products

See Model Certificate # 3 in Appendix.
AMS/USDA Certificate: to ensure wholesomeness and that the product was produced according to U.S. regulations and standards.
APHIS/USDA: Products come healthy animals.

8. Beef

Sanitary Certificate is being finalized by the FSIS and Ministry of Agriculture

Certificate of physical, chemical, and microbiological analysis: Show conformity of contents and microbiological status with Moroccan standards.

AMS/USDA Grade Certificate: Must be Choice Grade to qualify as “Hilton Meat” and be exported as part of the Tariff Rate Quota and used by specific hotels and restaurants)

9. Poultry Meat

Sanitary Certificate is being finalized by the FSIS and Ministry of Agriculture

Certificate of physical, chemical, and microbiological analysis: Show conformity of contents and microbiological status with Moroccan standards.

10. Equine

Veterinary Sanitary Certificate is being finalized by the APHIS and the Moroccan Ministry of Agriculture

The animals were subject, with negative results, to tests carried out in blood sample.

11. Live Cattle - Purebred

The updated certificate agreed upon by APHIS/VS and the Moroccan Ministry of Agriculture can be found at:

Sanitary Certificate showing that the animals are free of some diseases of concern Laboratory Analysis Results: to attest that the tests have been made.
The Minimum performance of the imported animal and her parent meet the specifications of the Ministry of Agriculture.

12. Semen - Cattle

See last agreed upon model at: http://www.aphis.usda.gov/regulations/vs/iregs/animals/downloads/mo_bo_br_HC.pdf

There are minimum requirements on performance of the sires. Only some breeds can be imported into Morocco.
13. Milk Replacers / Calf Milk

See Model Certificate # 2 in Appendix.

Addition of a chemical tracer is required (needs to be specified).

Contain no fat from animal origin (except those of butyric origin)

Contains no harmful residues in quantities exceeding the maximum accepted for human health.

Do not contain radioactive elements

14. Honey and Bee Products

See Model Certificate # 4 in Appendix.

15. Hides and Skins

See Model Certificate # 5 in Appendix.

16. Hatching Eggs

See Model Certificate # 6 in Appendix.

17. Day Old Turkey

See Model Certificate # 7 in Appendix.

Section IV. Government Certificate’s Legal Entry Requirements

The Ministry of Agriculture will accept only certificates issued by government officials. Certificates issued by federal agencies as well as by state government agencies are normally accepted and even if not explicitly required could help greatly the acceptance of the products. In most cases, certification issued by the exporting companies or by entities that are not accredited and duly authorized by the U.S. government (such as private labs) are not sufficient evidence to clear sanitary inspection.

Issuance Date/Duration of the certificates: There is a Moroccan regulation that explicitly requires that phytosanitary certificates (for fresh fruits and vegetable and live plant materials) be issued at most 14 days before loading. For certain animal products, the certificate must be issued at most 10 days before loading. For some commodities (such as dairy cattle, cattle semen) the duration of the certificate is determined by the date of the required tests on the animals/products, and thus the certificate would be valid only for certain periods.

For dairy products, although it is preferable that the date on the AMS certificate be prior to the date of shipment of the product, the Ministry of Agriculture would accept certificate that are issued after the loading dates. Also, certificates that are too old (several months) likely will not be accepted by the port inspectors or, at best, will delay the customs clearance significantly.

Original of the certificates are needed by electronic and fax copies might be accepted to swiftly clear customs but the importer remains responsible for providing the original of the certificate.

Each shipment must have a separate sanitary certificate.

For goods transiting through Europe, a sanitary certificate issued by the U.S. authorities is required. If, originally the
good was not specifically meant to be exported to Morocco, the sanitary certificate issued by USDA to the European Authorities can be accepted but an additional certificate certifying that the commodity has been properly handled and stored while in Europe might be necessary

**Section V. Other Certification/Accreditation Requirements**

The Ministry of Agriculture does require for imported food products a radioactivity free certificate. A general certification statement from a federal/State agency about the reduced risk of having radioactivity in the imported products should be acceptable.
