New Zealand

Food and Agricultural Import Regulations and Standards - Certification

FAIRS Export Certificate Report

Approved By:
Hugh Maginnis, Agricultural Counselor

Prepared By:
Vinita Sharma, Marketing Specialist

Report Highlights:
This report outlines regulatory requirements for food and agricultural products exported to New Zealand. The sections on food laws, copyright and trademarks laws have been updated since the last report.
Section I. List of All Export Certificates Required By Government

Summary

Ministry of Primary Industries (MPI) is the key organization that regulates food imported into New Zealand. In 2011, the New Zealand Food Safety Authority (NZFSA) and Biosecurity New Zealand (BNZ) merged with the Ministry of Agriculture and Forestry (MAF). In April 2012, the Ministry of Fisheries was then merged with expanded MAF to create the Ministry for Primary Industries (MPI).

The MPI has the lead role in biosecurity protection (e.g. preventing unwanted pests and diseases being imported into New Zealand, and controlling, managing or eradicating them should they arrive). New Zealand has strict biosecurity rules and most unprocessed products cannot be imported into New Zealand unless an import health standard has been developed. New Zealand defines biosecurity as “the exclusion, eradication or effective management of risks posed by pests and diseases to the economy, environment and human health.” New Zealand’s biosecurity requirements cover terrestrial, freshwater and marine environments. Import health standards specify the biosecurity requirements that must be met for trade to occur.

In New Zealand, import health standards are based upon risk analyses, which assess either a commodity or a pest/pathway combination. Biosecurity New Zealand takes legislative requirements and international obligations into account when conducting risk analyses and developing import health standards. The principal document for all New Zealand import health standards is the Biosecurity Act (1993). The act provides for management of risks associated with imported goods such as produce, seeds and plants principally through import health standards.

In March 2015, the New Zealand government approved the Food Act 2014, which will replace Biosecurity Act (1993). This new Act will come into force on March 1, 2016. The Food Act 2014 promotes food safety by focusing on the processes of food production, not the premises where food is made. A central feature of the new Act is a sliding scale where businesses that are higher risk, from a food safety point of view, will operate under more stringent food safety requirements and checks than lower-risk food businesses.

The new law recognizes that each business is different – unlike the old Food Act 1981 and its one-size-fits-all approach to food safety. The new Act means that a corner dairy operator who reheats meat pies won't be treated in the same way as the meat pie manufacturer.

The Act brings in new food safety measures:

- food control plans (FCPs) for higher-risk activities
- national programs for lower-risk activities.

Please see New Zealand Food and Agricultural Import Regulations and Standards (FAIRS) report on Food Laws, Food Labeling and Packing requirements for imported foods in New Zealand, reports can be found at:
http://gain.fas.usda.gov/Lists/Advanced%20Search/AllItems.aspx
### Export Certification Requirements

The table below provides export certificate requirements for many products exported to New Zealand from the United States.

<table>
<thead>
<tr>

</table>

Peanuts are considered a high risk food because they have been found to contain mycotoxins, mold and insects.
| **Almonds** | Packaged for direct retail sale or in packages up to and including 10 kgs. If more than 10 kgs, inspection is required.  
Please check the New Zealand Import Health Standard (IHS) (Section 9.8) Stored products for Human Consumption for more information. |  | www.mpi.govt.nz |
| **Dried Fruits** | No phytosanitary certificate required  
There are no certification or inspection requirements for dried, freeze dried, dehydrated or flaked fruit and vegetables that are commercially manufactured or produced and listed in the Plants Biosecurity Index database, except for those that may have seeds that are entered as “Entry Prohibited” and those listed in sections 9.3, 9.4 and 9.7 of the Stored products for Human Consumption import health standard. | Biosecurity | Ministry of Primary Industries www.mpi.govt.nz |
| **Stone Fruits**  
(California Nectarines and Peaches) | Phytosanitary certificate issued by the Animal Plant Health Inspection Service (APHIS) of the U.S. Department of Agriculture (USDA) required  
Please see section 6.1.4 of the Fresh Peach and Nectarine from California import health standard regarding phytosanitary certificate requirements.  
APHIS must provide the additional declarations to the phytosanitary certificate:  
"The peaches and nectarines in this consignment have:  
- been inspected in accordance with appropriate official procedures and found to be free of any visually detectable regulated pests specified by the New Zealand Ministry of Agriculture and Forestry.  
AND  
- been treated in accordance with Appendix 1(b) of the Workplan between NZ MAF and APHIS, USDA.  
AND  
- undergone appropriate pest control activities that are effective against those Risk group 2 regulated pests specified by NZ MAF.  
OR  
been sourced from an area free (verified by an official detection survey) from those Risk group 2 regulated pests specified by NZ MAF." | Biosecurity | Ministry of Primary Industries www.mpi.govt.nz |

Section II. Purpose of Specific Export Certificate(s)

See table in Section I.

Section III. Specific Attestations Required on Export Certificate(s)

Please refer to the Table under Section I, for required attestations and the Biosecurity New Zealand website for specific information on IHSs and attestation requirements. http://www.biosecurity.govt.nz/ihs/search

Section IV. Government Certificate’s Legal Entry Requirements

Entry requirements are set out on the Import Health Standards.

Original documents relating to the shipment must accompany each shipment. Most certificates are valid for one shipment only and are required to be issued by APHIS, USDA.

Section V. Other Certification/Accreditation Requirements

U.S. exporter are required to meet both biosecurity and food safety requirements. For more information on New Zealand’s food safety requirements, please visit www.nzfsa.govt.nz. Please also refer to the FAS/Wellington report entitled Food and Agricultural Import Regulations & Standards which can be found at: http://gain.fas.usda.gov/Lists/Advanced%20Search/AllItems.aspx.
