Spain

Food and Agricultural Import Regulations and Standards - Narrative

FAIRS Country Report

Approved By:
Robert Hanson. Agricultural Counselor

Prepared By:
Marta Guerrero. Agricultural Specialist

Report Highlights:
Spain is a member of the European Union (EU) and it follows EU directives and regulations. This report is an update of SP1126 and outlines the applicable legislation regarding the export of U.S. food products to Spain, particularly those rules that differ from EU legislation. This report should be read in conjunction with the EU-27 Food and Agricultural Import Regulations and Standards Report.
DISCLAIMER: This report was prepared by the Office of Agricultural Affairs of the USDA/Foreign Agricultural Service in Madrid, Spain for U.S. exporters of domestic food and agricultural products. While every possible care was taken in the preparation of this report, information provided may not be completely accurate either because policies have changed since its preparation, or because clear and consistent information regarding these policies was not available. It is highly recommended that U.S. exporters verify the full set of import requirements with their foreign customers, who are normally best equipped to research such matters with local authorities, before any goods are shipped.

FINAL CUSTOMS CLEARANCE APPROVAL OF ANY PRODUCT IS SUBJECT TO THE IMPORTING COUNTRY’S RULES AND REGULATIONS AS INTERPRETED BY BORDER OFFICIALS AT THE TIME OF PRODUCT ENTRY.

Table of Contents

Section I. Food Laws: ............................................................... 2
Section II. Labeling Requirements: ............................................ 4
Section III. Packaging and Container Regulations: ............................ 5
Section IV. Food Additives Regulations: ........................................ 5
Section V. Pesticides and Other Contaminants: ................................ 6
Section VI. Other Regulations and Requirements: ............................. 8
Section VII. Other Specific Standards: ......................................... 8
Section VIII. Copyright and/or Trademark Laws: ............................. 12
Section IX. Import Procedures: .................................................. 13
Appendix I. Government Regulatory Agency Contacts: ...................... 15
Appendix II. Other Import Specialist Contacts: ................................ 19

Section I. Food Laws:

Spain is a member of the EU since 1986. As a member of the European Union (EU), Spain follows all EU directives, regulations, and obligations where available. While EU Regulations are binding and directly applicable to the Member States, EU Directives have to be transposed into National law. EU Decisions are binding and directly applicable to whom they are addressed.

This report outlines the applicable legislation regarding the export of U.S. food products to Spain, particularly those rules that differ from EU legislation or regulation. Exporters should be aware that when EU-wide legislation is incomplete, absent or there is room for interpretation, Spanish laws apply and imported product must meet existing Spanish requirements.

For detailed information on EU Food and Agricultural Import Regulations and Standards (FAIRS), see reports produced by the U.S. Mission to the EU in Brussels, Belgium which can be accessed from their website: http://www.usda-eu.org/.
Food and beverage products originating in the United States do not require any special Spanish permits and are not subject to special rules or regulations regarding retail sale in Spain. However, all products must comply with the generally applied rules and regulations required for any food and beverage product sold within the EU market. Spain’s food regulations apply to both domestically produced and imported food products.

**Spanish Food law**

At the EU level, Regulation (EC) 178/2002 sets out general principles and objectives in food law. In Spain, the Food Safety and Nutrition Law (Law 17/2011) published in July 2011, outlines the basic Spanish food and feed regulations. This law is based in EU Regulations and Directives and includes the traditional food safety aspects of detection and removal of physical, chemical and biological hazards as well as other less conventional issues such as obesity prevention and food advertising rules. It applies to domestically produced and imported products.

The Spanish Food Safety and Nutrition Law establishes basic definitions, goals and principles for food safety. It also defines procedural rules, coordination mechanisms between the different public administrations with responsibilities in official food control. It sets out general food safety and health protection rules, regulates inspection, detention and seizure rules of suspect food and classifies breaches.

Spain has a decentralized system for testing and controlling the feed and food chain. While the central government has total oversight over the controls carried out in customs, the autonomous communities establish their own monitoring and sampling plans throughout the food and feed chain coordinated by national authorities. Sampling plans are based on risk assessment and sampling is primarily done at the wholesale and the processing level.

**Relevant Competent Authorities**

In Spain, the Ministry of Health, Social Services and Gender Equality (MSSSI) controls agricultural product imports intended for human consumption; while the Ministry of Agriculture, Food and Environment (MAGRAMA) controls imports of animal feed/ingredients and live animals not intended for direct human consumption.

Food Safety is the responsibility of the Spanish Food and Safety and Nutrition Agency (AESAN), ascribed to the MSSSI that coordinates the food chain control. AESAN was established as an independent agency and it is also responsible for risk management. Within the MAGRAMA, the Sub directorate General for Livestock Resources coordinates the National plan in feedstuffs.
Contact data for the above mentioned departments can be found in Appendix I.

Please note: The following products sourced in the United States and imported into the EU must originate from an EU-approved U.S. establishment - red meat, meat products, farmed and wild game meat, ratites, milk and milk products, seafood, bovine embryos and semen, porcine and equine semen, gelatin and animal casings.

Section II. Labeling Requirements:

At the EU level, general rules on the labeling, presentation and advertising of foodstuffs are laid down by Regulation (EC) 1169/2011. This regulation consolidates general labeling requirements in a single text.

Spain applies EU-harmonized legislation to:

- General Labeling Requirements
- Nutritional Labeling
- Product-Specific Labeling

The U.S. standard label does not comply with EU labeling requirements.

General Labeling Requirements

In Spain, Royal Decree 1334/1999 as amended regulates food labeling by transposing EU Directives 79/112/CEE and 2000/13/CE.

Information required includes:

- Product name
- List of ingredients and quantity of certain ingredients or category of ingredients
- Alcoholic content when it is over 1.2% in volume
- Net weight in packaged products
- Expiration date
- Storage and use conditions
- Use instructions when essential to make a proper use the product
- Company identification: name and address of the manufacturer or packer or seller established within the European Union
- Batch information
- Country of Origin
Misleading labeling attributing properties that the foodstuff does not have is not accepted.

The Government of Spain permits multi-language labeling and stickers; however, one of the languages must be Spanish. U.S. food manufacturers or exporters are encouraged to contact their potential importer to learn the labeling requirements applicable.

For detailed information on the EU-harmonized labeling legislation, please consult the EU-27 FAIRS Report well as the USEU website section on labeling. Detailed information on labeling can be found in the USEU report on New EU food labeling rules that will apply from December 13, 2014.

**Nutritional Labeling**

Food products carrying health claims must comply with the provisions of nutritional labeling directive 90/496/EC. Regulation 432/2012, which establishes a list of permitted health claims made on foods, other than those referring to the reduction of disease risk and to children’s development and health became applicable on December 14, 2012.

More information can be found in AESAN’s website.

**Product-Specific Labeling**

For a number of products, specific labeling requirements have been established in addition to the general requirements described above. More details on above products can be found in Section VII.

**Section III. Packaging and Container Regulations:**

Spain applies EU-harmonized legislation to packaging and containers.

There are two EU Directives related to the making-up by weight or by volume of certain prepackaged products (Council Directive 76/211/EEC) and laying down rules on nominal quantities for pre-packed products (Directive 2007/45/EC) that were transposed into Spain’s National Law by Royal Decree 1801/2008.

For more detailed information on the EU’s harmonized legislation on packaging and container regulations, please consult the EU-27 FAIRS Report as well as the USEU website section on packaging.

**Section IV. Food Additives Regulations:**
Spain applies EU-harmonized legislation regarding food additives. For detailed information on the EU-harmonized legislation on food additive regulations, please consult the EU-27 FAIRS Report as well as the USEU website section on additives.

Section V. Pesticides and Other Contaminants:

Tolerance for pesticide residues were harmonized in the EU in 2008. Spain strictly adheres to EU-harmonized legislation on pesticides and contaminants.

The complete list of MRLs, and commodity combinations allowed in the EU can be obtained from the Commission’s webpage.

When a pesticide is not listed under the EU harmonized MRL list, an authorization request can be submitted to the Spanish administration. (Ministry of Agriculture, Food and Environment - Subdirección General de de Sanidad e Higiene Vegetal y Forestal).

For application of an import tolerance for a non-yet regulated substance in Spain contact:

Subdirección General de de Sanidad e Higiene Vegetal y Forestal
C/Almagro, 33
28071 Madrid.
sgmpagri@magrama.es

The request form is available in the Ministry’s website.

For detailed information on EU-harmonized legislation on pesticide and contaminant regulations, please consult the EU-27 FAIRS Report as well as the USEU website section on pesticides.

Private Industry Standards

While the official standards are set by the public administration, the large majority of food retailers require certification of good agricultural practices. The private certification schemes include not only stricter limits for MRL but also with other additional requirement. The most widely used schemes in Spain include AENOR, Globalgap, BRC, IFS and Q+S.

Voluntary Aflatoxin Sampling Plan for Almonds

The Spain is a major import market for tree nuts and the United States is the primary supplier to Spain. As of September 1, 2007, the EU implemented Special Import Conditions (European Commission
Decision 2007/563/EC), which called for mandatory testing of California almonds imported to EU member countries. The California almond industry and the USDA developed a Voluntary Aflatoxin Sampling Plan (VASP) comparable to the EU sampling procedures so that almonds can be uniformly tested before they are shipped to the EU.

In March 2012, the European Commission implemented the Regulation 274/2012, amending Commission Regulation 1152/2009, imposing special conditions governing the import of certain foodstuffs from certain third countries due to contamination risk by aflatoxins.

Regulation 274/2012 states that it is appropriate to repeal the transitional provision for foodstuffs imported from the United States of America, which are not covered by the Voluntary Aflatoxin Sampling Plan (VASP), as sufficient time has been provided to operators in the United States of America to implement the Voluntary Aflatoxin Sampling Plan. Almonds with a VASP certificate are subject to random testing while almonds without this certificate are subject to being rejected.

Regulation 1152/2009 introduced the use of a Common Entry Document (CED), similar to the Common Veterinary Entry Document (CVED) used for veterinary products. Starting January 1, 2010, the importer has to provide prior notification to the competent authorities at the designated port of entry for the goods covered by the regulation at least one working day prior to the arrival of the goods, using the CED. The CED was published in Annex II of the Regulation 669/2009.

Provisions for methods of sampling and analysis for the official control of mycotoxins including aflatoxins are laid down in Commission Regulation 401/2006 as amended by Commission Regulation 178/2010. As of March 13, 2010, sampling under the VASP is performed on the basis of a 2x10 kg sample, in accordance with the new EU sampling legislation. For additional information see Annex VII B of the EU guidance document.

For additional information on the VASP program check the Almond Board of California website.

Commission Regulation (EU) No 165/2010 increased the maximum aflatoxin levels for almonds and pistachios, as well as apricot kernels, hazelnuts and Brazil nuts, bringing them in line with the Codex Alimentarius levels for tree nuts adopted in July 2008. As a result of both new EU regulations, EU aflatoxin levels are in line with existing Codex maximum aflatoxin levels and sampling plans. However, EU legislation has more extensive product coverage and also includes separate maximum limits for aflatoxin B1.

The new levels, effective on March 9, 2010, changes to maximum tolerance for aflatoxin to the following:

For more information, see the [E50018 GAIN report](https://gainstate.gov/).

**Section VI. Other Regulations and Requirements:**

The Spanish Government applies EU-harmonized legislation for other related regulations and requirements including product inspection, registration and certification.

For detailed information on certification, please see the [USEU certification site](http://www.useu.org/certification).

**Please note:** [Council Directive 2000/29/EC](http://eur-lex.europa.eu/), harmonizes the importation requirements of plants and plant products into the EU. Phytosanitary certificates, issued by an APHIS inspector, are required to accompany all plant and plant products entering the EU. Your nearest APHIS Export Certification Specialist can be found in this [link](https://www.aphis.usda.gov/aphis/ajhp/certification). For detailed information on specific certificates to export to Spain please consult the latest version of [Spain’s FAIRS Certificate report](https://fairs.state.gov).

**Section VII. Other Specific Standards:**

For detailed information on the EU-harmonized legislation on other specific standards, please consult the [EU-27 FAIRS Report](https://fairs.state.gov) or the [USEU import rules](http://www.useu.org) website.

**Genetically Modified Foods and Feeds**

There are two relevant Authorities that weigh-in on Spain’s biotechnology decision making process, which are the National Biosafety Commission (CNB) and the Inter-ministerial Council for GMOs (CIOMG). The CNB takes a scientific approach, whereas CIOMG’s approach is technical. Both bodies are ascribed to the Ministry of Agriculture, Food and Environment.

For more information, please see [Spain’s Biotech Annual Report](https://fairs.state.gov).

Spain has a decentralized system for testing and controlling unauthorized presence of GMO in the feed and food chain. While the central government has a total control over the controls carried out in customs, the 17 autonomous communities establish their own monitoring and sampling plans throughout the food and feed chain coordinated by national authorities. Sampling plans are based on...
risk assessment. Sampling is primarily done at the wholesale and the processing level.

Novel Foods

The Novel Food Regulation (EC) 258/1997 lays down detailed rules for the authorization of novel foods and novel food ingredients, including foods derived from, containing, or consisting of GMOs. It defines novel foods as foods and food ingredients that were not used to a significant degree in the EU before May 15, 1997.

The EU catalogue on Novel Foods can be consulted in the EU Commission’s website. This catalogue provides information on whether or not a product would require authorization under the Novel Food Regulation. The list of novel food applications, authorizations, rejections and withdrawals can also be found in the Commission’s website.

Experts belonging to AESAN (Spanish Food Safety and Nutrition Agency) participate in the EU decision making process by attending the discussions in the Novel Food Working Group. New authorizations can be submitted to Member State’s competent authorities. A summary on the authorization process when submitted to the Spanish competent authorities can be found in the link (Spanish language only).

Fortified Foods

European Parliament and Council Regulation 1925/2006 amended by Regulation (EC) 1170/2009 establishes an EU-wide regulatory framework for the addition of vitamins and minerals and of certain other substances such as herbal extracts to foods. It lists the vitamins and minerals that may be added to foods and sets criteria for setting maximum and minimum levels.

The use of vitamins and minerals not included in the annexes to Regulation 1925/2006 is not allowed. However, Member States may provide for a temporary derogation (until January 19, 2014) for vitamins and minerals not included in the annexes. Such derogations should be obtained from the competent authorities in the individual Member States. In Spain, AESAN, Spain’s Food Safety and Nutrition Agency, is the competent authority to grant this temporary derogation. Requests should be submitted to:

Ministerio de Sanidad y Servicios Sociales e Igualdad
Agencia Española de Seguridad Alimentaria y Nutrición (AESAN)
Dirección Ejecutiva
C/ Alcalá, 56
28071 Madrid
Tel.: +34-91-338-0585
Foodstuffs for Particular Nutritional Uses

Specific directives on foods and beverages for athletes or on foods intended for diabetics are still subject to Member State legislation. The introduction of foodstuffs intended for particular nutritional uses for which no specific rules are set must be notified to the Member State where the food is sold. Spain’s competent authority is AESAN. Notification should be addressed to:

Agencia Española de Seguridad Alimentaria y Nutrición (AESAN)
Dirección Ejecutiva
C/ Alcalá, 56
28071 Madrid
Tel.: +34-91-338-0585
Fax: +34-91-227-0073
E-mail: aesande@msssi.es

Organic Foods

On February 15, 2012, the European Union and the United States announced that beginning June 1st, 2012 their respective countries’ certified organic products will be recognized. All products traded under the agreement must be accompanied by an organic export certificate. More information about this partnership can be found on the USDA Organics Home Page for International Agreements.

Vertical Legislation (Breakfast Directives)

Directive 2001/112/EC amended by Directive 2012/12/EU regulates to fruit juices and certain similar products intended for human consumption. Key amendments which affect to the fruit juice labeling rules include orange juice, nutrition claims, mixed juices and sugars and sweeteners. While Directive 2012/12/EC remain pending of being transposed to national law when this report was prepared, Royal Decree 1050/2003 transposed Directive 2001/122/EC.

More information about EU fruit juice labeling requirements can be found in the GAIN Report E70022.

Frozen Foods

Quick-frozen foodstuffs sold to the final consumer should carry the following additional labeling indications: the product name with the indication “quick-frozen”; the date of minimum shelf life; the period during which the purchaser may store the product; the storage temperature and/or type of storage equipment required; batch identification; a clear indication of the type “do not re-freeze after defrosting”.

**Food Irradiation**

Harmonization of EU rules on food irradiation has been slow and only a few products have so far received EU-wide approval. Framework Directive 1999/2/EC outlines the marketing, labeling, import and control procedures and technical aspects of food irradiation. Irradiated foods must be labeled "irradiated" or "treated with ionizing radiation". Implementing Directive 1999/3/EC establishes a Community list of foods and food ingredients authorized for irradiation treatment. The list contains only one food category: "dried aromatic herbs, spices and vegetable seasonings". Until the EU positive list is expanded, national authorizations continue to apply. The list of Member States’ authorizations of food and food ingredients which may be treated with ionizing radiation can be consulted in the link.

**Seafood**

Council Regulation 2406/96 lays down common marketing standards for certain fishery products. NOAA (National Marine Fisheries Service) of the U.S. Department of Commerce is the unique competent authority for the certification of fishery and aquaculture products intended for the EU. More detailed information can be found in the Guide: “How to export Seafood to the European Union”.

As of December 13, 2014, all seafood sold at RETAIL must have nutritional information on the package. Regulation 1169/2011 describes the minimum information to mention of labels intended for retail or mass caterers. Exporters should pay specific attention to Article 9 and following articles as well as all annexes of the Regulation. A new requirement regarding labeling of frozen food is in place since July 1, 2012. The intention of Regulation 16/2012 is to ensure that the information on the date of production and freezing is provided to the food business operator to whom the food is supplied and not to the consumers. Point 3 of Regulation (EU) no 16/2012 stipulates that the information must be available in an appropriate form which is up to the choice of the supplier. This does not imply that it has to be done through labeling or through the certificates. In practice, the information may be made available on the commercial document, catch certificate or in any other appropriate document that is sent to the next Food Business Operator in the chain. According to the interpretation of the European Commission the document containing the requested information does not necessarily need to be presented at the BIPs. The control of the proper fulfillment of the rules will be carried out on a more general basis such as an audit by the Food and Veterinary Office. Other sets of Regulations regarding ingredients, allergens and guidelines for the implementation of labeling legislation can be downloaded from DG SANCO’s website.
Pet Food

Information on requirements to export pet food to the EU can be found in the FAS USEU website as well as in the GAIN Report Exporting Pet Food to the EU.

European Parliament and Council Regulation 767/2009 sets out new rules for the labeling and marketing of feed and pet food. More information about EU pet food labeling requirements can be found in the GAIN Report E50060.

Section VIII. Copyright and/or Trademark Laws:

The regulations and standards covered under this section have been harmonized with the European Union requirements. However, the EU-harmonized trademark regulation did not replace the existing laws at the Member State level. Both systems coexist.

For detailed information on EU-harmonized legislation, please consult the EU-27 FAIRS Report. Also please refer to Council Regulation 207/2009, which created a single, unitary trademark registration system for the entire European Community. Applications for registering under the Community Trademark Register must be submitted to the Spanish based Office for Harmonization in the Internal Market (See contact data in Appendix I).

In Spain the legal basis for trademarks is laid down by National Law 17/2001. The trademark protection is granted for 10 years after which it can be renewed. Requests should be addressed to the Spanish Office for Patents and Trademarks (See contact data in Appendix I).

For detailed information on the EU-harmonized legislation on copyright and/or trademark laws, please consult the EU-27 FAIRS Report as well as the USEU website.

In December 2012, the EU Parliament approved the regulations that would establish the single patent for the EU. However, Spain (and Italy) decided to opt out due to discrepancies with the patent’s linguistic regime. As a consequence, companies or individuals who want to protect their innovations throughout the whole EU will have to request a patent in three places – in Munich, the headquarters of the European patent, in Spain, and in Italy. More information on the unitary patent can be found in the link.

At the Member State level, the Spanish Office for Patents and Trademarks, ascribed to the Ministry of Industry, Energy and Tourism, is the public body responsible for the registration and granting the different types of Industrial Property ranking from industrial property titles, including brands and commercial names (or distinctive signs), inventions, and industrial designs.

In addition, Spain is a member of the World Intellectual Property international Organization (WIPO), a
signatory to the Paris Convention for the Protection of Industrial Property, and a party to the Madrid Agreement on International Registration of Trademarks and Prevention of the Use of False Origins. Both the Trademark and the Intellectual Property Laws address protection of brand names and trademarks.

**Designation of Origin and Geographical Indications**

Regulation 1151/2012 sets out the mechanisms to protect PDOs and PGIs in third countries. In any case, some regulations additional regulations need to be adopted for it to be fully functional.

Note: Wines and spirit drinks are covered by separate legislation.

Lists of protected names by country, product type, registered name and name applied for are available through the Commission’s online “DOOR” (Database of Origin and Registration) database.

**Section IX. Import Procedures:**

As a member of the European Union (EU), Spain follows all EU directives, regulations, and obligations where available. Since the EU is a customs union, all Member States apply the same import duties on goods imported from outside the EU based on tariff classification of goods and the customs value. Once import goods are cleared in one Member State, they can be moved freely throughout the EU territory.

Council Regulation 2913/92 establishes the Community Customs Code. Commission Regulation 2454/93 lays down provisions for the implementation of the Code. Regulation 450/2008 establishing the “Modernized Customs Code” was adopted in 2008 but is not yet applicable.

EU’s applicable duties information can be found in the on-line customs database.

It is possible to obtain Binding Tariff Information (BTI) from a Member State Customs Authority. In the case of Spain, Agencia Tributaria, ascribed to the Ministry for the Treasury and Public Administration, is the responsible entity. Contact data for Agencia Tributaria can be found in Appendix I.

Other taxes applicable to agricultural products include the Value Added Tax (VAT) and inspection fees which are not harmonized throughout the EU.

A list of VAT rates applicable in the different Member States can be found in the [link](#). Spain standard
VAT rate is 21% percent, since September 1, 2012. The reduced rate applicable to passenger transport, hotel and restaurant services is set at 10 percent. The super-reduced tax for certain food products that include basic food items such as bread and grains, milk, cheese, eggs, fruits and vegetables, pulses and tubers is 4 percent.

Animal products are subject to inspection fees. The information on the inspection fees payment process for plant and animal products can be consulted in the Ministry of Finance and Public Administration website (only available in Spanish language).

**Import Documentation and Process**

The following documents are required for ocean or air cargo shipments of food products into Spain:

- Bill of Lading and/or Airway Bill
- Commercial Invoice
- Phytosanitary Certificate and/or Health Certificate when applicable
- See “SECTION VI. Other Regulations and Requirements”
- Import Certificate

Most food products require an Import Certificate issued by the competent Spanish authorities. This certificate must be obtained by a registered importer as it is intended for tariff classification purposes.

The import process requires:

- Pre announcement by Common (veterinary) Entry Document (CVED or CED)
- Documentary Check
- Identity Check
- Physical check

Agricultural products are examined when they enter Spain by the Spanish Border Inspection Posts. There are a number of border inspections points in Spain that carry out plant health inspection and veterinary inspection points for animal products intended for human consumption and animal products not intended for human consumption. Contact data for each of them can be found in the links.

Competent authorities on certificates vary depending on the type of products. While the Ministry of Social Services and Gender Equality (MSSSI) is responsible for of products intended for human consumption, the Ministry of Agriculture, Food and Environment (MAGRAMA) is responsible for agricultural products for purposes other than human consumption.

Goods are only released for free circulation within the EU once the documentary and analytical
requirements are checked and the import duty and other taxes that may be due are paid. Information on import duties can be consulted in the EU on-line customs data base.

U.S. exporters interested in introducing a product into the Spanish market should obtain local representation and/or a local importer/distributor to gain knowledge of the market, up-to-date information and guidance on trade laws and business practices, sales contacts, and market development expertise. As local importers have primary responsibility to the Spanish Government for imported food products entering Spanish territory, they are in the best position to provide guidance to U.S. exporters through the market-entry process. For additional information on the Spanish Market, please consult the latest Spain’s Exporters Guide.

Temporary Entry

Temporary entry may be permitted for goods in transit (up to 24 months), manufacturing for re-export, and/or for temporary storage. Generally, the exporter must pay normally applied import duties and VAT, which are then reimbursed upon re-export of the merchandise to a destination outside the EU.

Samples and Advertising Material

Spain grants duty free entry to giveaway samples if properly labeled. Samples are, however, subject to the same import documentation requirements that apply to normal commercial imports. They also require a nominal value for customs declaration purposes on the commercial invoice which must carry the statement “Samples without Commercial Value.”

For detailed information on the procedure to import samples without commercial value to Spain please consult the Spain’s latest FAIRS Certificate report.
