Food and Agricultural Import Regulations and Standards Report

FAIRS Export Certificate Report – 2018

Approved By:

Emily Scott

Prepared By:

Gellért Gólya

Report Highlights:

Hungary has fully implemented EU regulations for the imports of products of animal and plant origin. U.S. export certification requirements for most products destined for the EU have been harmonized. Products not yet harmonized are subject to Hungarian national regulations.

Author Defined:

Disclaimer

This report was prepared by the Office of Agricultural Affairs of the USDA/Foreign Agricultural Service in Budapest, Hungary for U.S. exporters of domestic food and agricultural products. While every possible care was taken in the preparation of this report, information provided may not be completely accurate as policies may have changed since its preparation, or because clear and consistent information about these policies was not available. It is highly recommended that U.S. exporters verify the full set of import requirements with their foreign customers, who are normally best equipped to research such matters with local authorities, before any goods are shipped. FINAL IMPORT APPROVAL OF ANY PRODUCT IS SUBJECT TO THE IMPORTING COUNTRY'S RULES AND REGULATIONS AS INTERPRETED BY BORDER OFFICIALS AT THE TIME OF PRODUCT ENTRY.

Hungary has fully implemented EU regulations for the import of products of animal and plant origin. The export certification requirements for most products destined for the EU market have been harmonized. For additional information on U.S. export certifications for the EU market, please see the [USEU Brussels website](#).

Few products not yet harmonized are subject to Hungarian national regulations. The competent Hungarian authority needs to be consulted on a case-by-case basis to address requirements for them.

Imported products must meet existing member state requirements, and products must be accompanied by the proper certification at port of arrival. In general, health certificates are required for all imported products of animal origin and phytosanitary certificates are needed for all plant products that could introduce pests into the EU. In Hungary, food safety is the primary responsibility of the [Ministry of Agriculture](#) and its background institute, the [National Food Chain Safety Office](#) (in Hungarian).

Export certificates must be in the official language of Hungary, which is Hungarian. The [Hungarian Trade Licensing Office](#) issues import licenses of agricultural products in accordance with the European Community legislation. Usually an exporter, or possibly an importer, applies to the authority filling out the [prescribed form](#) with all relevant details. For non-harmonized exports of live animals and animal products to Hungary, the prescribed application must be submitted to the [Animal Health and Animal Welfare Directorate](#) (in Hungarian) of the National Food Chain Safety Office.

EU food legislation is translated into the 24 official languages in use in the EU-28 (including Hungarian) and is published in the Official Journal. The [Eurlex website](#) provides free access to the EU laws.

EU plant and plant product import regulations have been harmonized and are published in a single directive. Unlike veterinary products, there is only one model certificate for all plant products in accordance with international regulations laid down by the [International Plant Protection Convention](#) of the Food and Agriculture Organization of the United Nations

This report should be read in conjunction with the [EU FAIRS Export Certificate report](#) prepared by

the USDA FAS Office in the U.S. Mission to the European Commission (USEU) in Brussels, Belgium.
