### Grain Report

**Report Categories:**

Grain and Feed

**Approved By:**

Christine Sloop

**Prepared By:**

Andreja Misir

**Report Highlights:**

This report contains MY 2013/14 preliminary production forecast for wheat, corn, and barley.

**General Information:**

## Wheat

MY 2013/2014 (July/June) wheat area is forecast at 185,000 hectares (ha). Total production is forecast at about 950,000 MT. Under this scenario, Croatia would have around 400,000 MT of wheat for export.

## Corn

MY 2013/2014 (October/September) corn area is forecast at 310,000 ha. Total production is expected to be reach close to 2 million MT, creating a surplus of about 250,000 MT for potential export.

## Barley

MY 2013/2014 (July/June) barley area is forecast at 50,000 ha or about the same as last year. Production is forecast at 195,000 MT, which will not meet domestic demand; thus imports will likely reach 25,000 MT.

## Tariffs

Tariffs and quota information can be found at [www.carina.hr](http://www.carina.hr) or obtained from the USDA/FAS office in Zagreb by contacting Andreja Misir, USDA/FAS, Agricultural Specialist, [andreja.misir@usda.gov](mailto:andreja.misir@usda.gov).
