National Dairy Standard - Evaporated Milk

Report Categories:
FAIRS Subject Report

Approved By:
William Westman

Prepared By:
Mark Petry and Bao Liting

Report Highlights:
On November 20, 2009, China notified the WTO of "National Food Safety Standard of the People’s Republic of China for Evaporated Milk and Sweetened and Condensed Milk” as SPS/N/CHN/130. This standard relates to the quality specifications of this type of milk product. The date for submission of final comments to the WTO is January 1, 2010. The proposed date of entry into force has not been specified.

Executive Summary:
On November 20, 2009, China notified the WTO of "National Food Safety Standard of the People’s Republic of China for Evaporated Milk and Sweetened and Condensed Milk” as SPS/N/CHN/130. This standard relates to the quality specifications of this type of milk product. The date for submission of final comments to the WTO is January 1, 2010. The proposed date of entry into force has not been specified.
According to the WTO notification, “This standard applies to the production, circulation, supervision and management of evaporated milk, sweetened condensed milk and formulated condensed milk. It specifies the terms and definitions, technical requirements, food additives and nutrition fortifier, as well as the requirements of production process, packaging, labeling, storage, transportation and testing method for evaporated milk and sweetened condensed milk.”

Thanks go to the consortium of industry and 3rd country Embassies in Beijing for their assistance in translating and reviewing this standard.

This report contains an UNOFFICIAL translation of National Standard on Evaporated Milk and Sweetened and Condensed Milk.

**General Information:**
BEGIN TRANSLATION

**National Standard of Food Safety of the People’s Republic of China**

GB xxxx-xxxx

In substitution of GB 13102—2005, GB/T5417—2008

Evaporated milk and sweetened condensed milk

(Draft for proposal)

**Issued on**xxxx-xx-xxxx  **Implemented on** xx-xx-xxxx

Issued by Ministry of Health of the People’s Republic of China

**Preface**

This standard is in substitution of security index in GB 13102-2005 “Hygienic standard of condensed
milk” and GB/T 5417-2008 “Condensed milk”.

The main changes in this standard compared with GB 13102-2005 are as following:
--The standard name is changed to be “Condensed milk” from “Hygienic standard of condensed milk”
--Contents of terms and definitions are added;
--Sensory requirements and inspection methods for senses are modified;
--Index of impurity degree is deleted;
--The physical and chemical indexes of evaporated milk, sweetened condensed milk and formulated condensed milk are made: the concreted standard values for protein, fat, milk solids, saccharose, water and acidity.
--Regulations from GB2762 is cited for contaminants limit;
--Regulations from GB2761 is cited for fungi toxin limit;
--Microorganism indexes of evaporated milk and formulated evaporated milk are modified to be “meet the commercial asepsis requirement”;
--The method of expression for the microorganism indexes is modified;
--Index of Shigella is deleted;
--Marked requirement of “this production is not suitable for children less than 36 months old to eat” is added.

This standard is issued by and relevant to the Ministry of Health, People’s Republic of China.

Versions of standard substituted by this standard are:
——GB 5417-1985, GB 5417-1999, GB/T 5417-2008 ;

Condensed milk

1 Scope

The terms and definitions of condensed milk, technical requirements, food additives and nutritional supplements, process of production, and requirements for package, labeling, storage and transport as well as inspection methods are specified in this standard.

This standard is suitable for the production, circulation and supervision management of evaporated milk, sweetened condensed milk and formulated condensed milk.

2 Normative cited documents

The clauses in the following documents are cited by this standard and become the clauses in this standard. For the cited documents which are labeled with date, all their subsequent modification sheets (corrections are not included) or modified versions are not applicable for this standard. However, the sides coming to an agreement according to this standard are encouraged to study whether the newest version of these documents can be used or not. For the cited documents which are not labeled with date, their newest versions are applicable for this standard.

GB2760 Hygienic standard for the use of food additives
GB2761 Fungi toxin limit for food
GB2762 Contaminants limit for food
GB4789.2 Microbiological examination of food  Determination of total numbers of colony
3 Terms and definitions
The following terms and definitions are applicable for this standard
3.1 Evaporated milk
Viscous product produced using milk and/or milk powder as materials through adding or not adding food additives and food nutritional supplements.
3.2 Sweetened condensed milk
Viscous product produced using milk and/or milk powder and sugar as materials through adding or not adding food additives and food nutritional supplements.
3.3 Formulated condensed milk
Viscous product added with adjuvant and produced using milk and/or milk powder as main materials through adding or not adding sugar, food additives and food nutritional supplements.

4 Technical requirements

4.1 Requirements for materials
4.1.1 Raw fresh milk should meet the requirements of GB19301
4.1.2 Other materials should meet the corresponding security standards and relevant regulations
4.2 Sensory indexes
The product should have the proper color, smell and taste, and have no contaminants and rare smell.
4.3 Physical and chemical indexes
The indexes should meet the regulations in table 1.

4.4 Contaminants limit
The indexes should meet the regulations in GB2762.

4.5 Fungi toxin limit
The indexes should meet the regulations in GB2761.

4.6 Microbial indexes
4.6.1 Microorganism indexes of evaporated milk and formulated evaporated milk should meet the commercial asepsis requirements.
4.6.2 Sweetened condensed milk and formulated sweetened condensed milk should meet the regulations in table 2.

Table 2 Microbial indexes

5 Food additives and nutritional supplements
5.1 The quality of food additives and nutritional supplements should meet the corresponding standards and relevant regulations.
5.2 The kind and using amount of food additives and nutritional supplements should meet the regulations in GB2760 and GB14880.

6 Production process

It should meet the regulations in GB12693.

7 Packaging

The material of the packaging container should meet the corresponding security standards and relevant regulations.

8 Labeling

8.1 Labeling should meet the regulations in GB7718 or GB13432 and relevant national regulations.
8.2 “This production is not suitable for children less than 36 months old to eat” is labeled.

9 Storage and transport

9.1 Storage
The product should be stored in the dry and ventilated places. It should not be stored in the same place with stuffs which are toxic and harmful with rare smell, and easy to evaporate and corrupt.
9.2 Transport
The transport of products should avoid sunlight and rain. It should not be transported mixed with stuffs which are toxic and harmful with rare smell or with factors which can affect the quality of product.

10 Method of inspection

10.1 Sensory indexes
Appropriate amount of samples are poured into the flask and observed for its color and contaminants under natural light. Inspector should smell the sample and taste the sample after rinse their mouths.
10.2 Physical and chemical indexes
10.2.1 Protein: measured according to the method specified in GB5009.5.
10.2.2 Fat: measured according to the method specified in GBXXXX.
10.2.3 Lactose and saccharose: measured according to the method specified in GB5413.5.
10.2.4 Water: measured according to the method specified in GB5009.3.
10.2.5 Acidity: measured according to the method specified in GBXXXX.
10.3 Microbial indexes
The equipments and materials for microbial inspection, sampling protocol, and process of samples for inspection are performed according to the regulations in GB4789.18.
10.3.1 Total amount of colony: inspected according to the method specified in GB4789.2.
10.3.2 Coliform group: measured using direct counting method specified in GB4789.3.
10.3.3 Salmonella: inspected according to the method specified in GB4789.4.
10.3.4 Staphylococcus aureus: inspected according to the method specified in GB4789.10.
10.3.5 Commercial asepsis: inspected according to the method specified in GB4789.26.
