**GAIN Report Number:** VM0078

## **Vietnam**

### **Rice Price - Weekly**

#### **Situation for the Week Ending November 26, 2010**

**Approved By:**

Jeanne Bailey

**Prepared By:**

Quan Tran

**Report Highlights:**

Exporters' price offers were unchanged last week for 5 percent broken rice and 10 percent broken rice, while prices for 15 percent broken rice and 25 percent broken rice continued to slightly decline. This decrease was due to larger quantities of these types of rice being available within the newly harvested crop, so local prices dipped to reflect larger supply.

Local paddy prices firmed-up last week. The late Autumn rice crop harvest in the Mekong River Delta was completed, and strong buying demand to fulfill outstanding export shipments supported high local paddy prices.
