Report Categories:

National Plan

Approved By:

Michael Riedel

Prepared By:

M. Meador and Ma Jie

Report Highlights:

On October 10, 2012, the Ministry of Healthy (now the National Health and Family Planning Commission, NHFPC) started reviewing existing standards on quality and safety of edible agricultural products, food hygiene, and food quality, as well as mandatory standards for food-related products. Eight expert teams reviewed standards in eight categories (food products, physical-chemical testing methods, micro-organism inspection and testing method, procedures and methods for toxicological assessment of food, special dietary foods, food additives, food related products, and good practice in production and operation).

NHFPC has completed its review of standards. Below is unofficial translation of the suggested list of national food safety standards for **food additives**.
